

UTILITREES™

The perfect fit for
under the wire!

Wireless® Zelkova

Small Stature

Mature heights which rarely exceed 25 feet eliminate tree/wire conflicts.

Street Tough

Disease and pest resistant, drought tolerant, require minimal maintenance.

Adaptable

Tolerant of varied soils, urban growing conditions and climates.

Pedestrian Friendly

Compact or vase shape allows for easy passage of pedestrians and vehicles.

Trees worthy of our UtiliTrees™ designation are those best suited for planting in the restricted zone between street and sidewalk and beneath utility lines. All mature at heights that are unlikely to tangle with overhead lines.

Pedestrian-friendly branching is compact or vase-shaped to allow for pruning without destroying the shape of the tree. Disease and pest resistant, these cultivars are tolerant of varied soils, climates and urban growing conditions, and require minimal maintenance.

Landscape architects, urban foresters, utility company arborists and other tree specifiers are invited to use our Tree LocatorSM service to find these trees in their region, grown to landscape size by our customers.
